

AI acknowledgement coversheet

This coversheet is designed to help you acknowledge any AI use in your assessment. If your course coordinator provides a course-specific template, please use that instead. The AI Student Hub has more information about using AI in assessment.

Your details

Name: Kaike Nehme

Student Number: s4959287

Assessment details

Course: DECO7230 Digital Prototyping and Extended Reality

Assignment: Interactive Prototype Outcome Evaluation 2 (Submission 3)

AI use

Select the option that applies:

- ☒ Yes, AI tools have been used to generate or edit material in this document
- ☐ No, AI tools have not been used to generate or edit material in this document

Details of use

Record the following information when acknowledging the use of AI tools:

- AI tool (e.g. Copilot, ChatGPT, Claude, Gemini)
- description of how you used the tool (e.g. edited, corrected, translated, planned, brainstormed)
- prompt(s) used
- relevant part, section, or page of the assessment
- date.

Complete the table below with this information.

Tool	Use	Prompt(s)	Section	Date
Claude Fable 5.1 (via Claude Code)	Exported my five iPad logger records and generated the results table straight from the JSON (no hand transcription), with raw counts per assumption and a data-quality list; I checked it against the logger on the day	Export the iPad logger records to testing-data/ip2a and generate the results table, with the counts for each assumption.	Section 2 (Results), Appendices A–D	25 September 2026
Claude Opus 5.5 (via Claude Code)	Drafted the analysis from my results and testing plan: patterns, verdicts on A1’–A4, and the data caveats (e.g. prompt timing). It also checked the colour generator code behind insight 3. I reviewed every verdict against the data	What do we need to do for the submission in two days? Then: Yes, start drafting Evaluation 2.	Sections 3–4, Appendix C	5 October 2026
Claude Opus 5.5 (via Claude Code)	Proposed the concept iterations and reflection points (fan-deck sample, lightness-based palette, toss-to-commit as a test candidate, real light in MR,	Yes, start drafting Evaluation 2.	Sections 5–6	5 October 2026

Tool	Use	Prompt(s)	Section	Date
	asking A2 by exposure). I decide which go into IP2b			
Claude Opus 5.5 (via Claude Code)	Generated the first draft of the whole document and its print layout (HTML/CSS to PDF) to the six-section template, 3 pages plus appendices, then reformatted it at my direction for clarity and bigger headings; I own every judgement in it	Yes, start drafting Evaluation 2. Then: The PDF is confusing; can you make the format clearer? Then: Can you make the section titles larger so they stand out?	Entire document	5 October 2026

Prompts are lightly edited for spelling and grammar; their meaning is unchanged. The prototype, testing plan, iPad session logger and on-device setup were also built with AI assistance; that use is logged in `ip2a/ai-use-log.md` in the repository. The test sessions and all data entry were done by me.
